## EXPERIENCE

**Ghana Music Live**                                                                 Remote
*Backend Engineer*                                                    Dec 2022 - March 2023

- Developed, designed and implemented new databases schemas for new Endpoints and also API endpoints as a part of an ongoing project
- Improved the quality of the legacy code base for the current project while transforming client needs into new product features.
- Responsible for implementing User news models, bookmarks function and vendors models.
- Worked with Frontend team to better deliver content to the frontend application.

**Ghana Music Live**                                                                 Remote
*Frontend Developer*                                                     Feb 2023 - Present

- Maintained an admin panel for managing user, administrative accounts and content for the Ghana Music Live Platform
- Implemented new features and improved user experience using React and NextJS
- Collaborated with other backend developers to integrate the Admin panel with the company's API and Server
- Implemented user statistics and analytics tracking of users for the Admin panel

**Evans Brothers Publishers**
